

Physical Security Checklist

Assess your security measures by answering the questions below. Grade each item based on your current implementation. Total the scores and refer to the grading scale to evaluate your system's strength.

Criteria	Grade (1-5)
Access Control	
1. Are access points (doors, gates) secured with locks or access control systems?	<input type="text"/>
2. Do you use key cards, biometric readers, or other authentication methods for access control?	<input type="text"/>
3. Are access codes regularly updated or changed?	<input type="text"/>
4. Is there a visitor management system in place to track and control access for guests?	<input type="text"/>
5. Are there policies in place to revoke access for terminated employees or individuals who no longer require access?	<input type="text"/>
Section Total	<input type="text"/>
Security Cameras	
1. Are there surveillance cameras installed in critical areas	<input type="text"/>
2. Do the cameras provide coverage of all entrances, exits, and vulnerable areas?	<input type="text"/>
3. Are the cameras regularly maintained and checked for proper functioning?	<input type="text"/>
4. Is the footage from the cameras recorded and stored securely?	<input type="text"/>
5. Are there policies in place to retain footage for a specific period?	<input type="text"/>
Section Total	<input type="text"/>
Alarm Systems	
1. Are there real-time alerts and notifications for security incidents?	<input type="text"/>
2. Are alerts delivered through multiple channels (email, SMS, mobile app, etc.)?	<input type="text"/>

3. Can you customize the types of events that trigger alerts?
4. Are there escalation procedures in place for critical alerts?
5. Are there logs or records of past alerts for review and analysis?

Section Total

Integrations

1. Does your security system integrate with other systems (access control, video management, etc.)?
2. Can you receive alerts and notifications through third-party applications or platforms?
3. Are there APIs or SDKs available for custom integrations?
4. Can the security system exchange data with other business systems (HR, IT, etc.)?
5. Are there pre-built integrations with popular security and businesses?
